- 2 U.S. Bureau of the Census American Community Survey data are based on a sample and are subject to sampling error. All estimated values shown are within the 90 percent confidence range. Census family data are slightly inflated because income levels are divided into ranges, including families with incomes up to \$49,999, which is somewhat higher than the North Carolina Tax and Budget Center’s living income standard of \$47,400 for a family of four in Mecklenburg County. All figures are current through 2005. In addition, Census data do not include the number of children present by family income. Therefore, a rule of thumb was used, estimating an average of 2.2 children per family.
